

AMETHYST PILLOW
AMAZING HEALING POWER

AMETHYST PILLOW

QUANTUM ENERGY FABRIC INSIDE

Get a Good Night's Sleep With an Amethyst and Tourmaline Pillow
Better quality elastic memory foam, 100% cotton cover, natural amethyst and natural tourmaline.

Natural Infrared Rays are the safest energy source.
The power of Amethyst: Amethyst is universally accepted as the healing crystal and has been since ancient times.
The energy of tourmaline: Tourmaline is abundant, consisting of complex boron and aluminum silicate minerals of variable composition.

Clay Cushion

Far infrared ray test

Ochre has the function of far infrared radiation. An ochre cushion includes no harmful chemical substances.

TESTING RESULT

Emissivity (5~20μm)	Emissivity Power (W/m ² · μm, 37°C)
0.894	3.45 x 10 ²

■ Test Method: KFIA-FI-1005

■ The temperature of 37°C is provided by the applicant. The above experimental results were measured in comparison with BLACK BODY by using the FT-IR Spectrometer.

Good Sleep:

Amethyst, as a healing stone, is believed to have sobering and calming qualities. This stone is commonly associated with peace. It has been deemed “nature’s tranquilizer” by many healers because of its effectiveness in relaxing the mind. Besides being a stone of tranquility and repose, Amethyst is also believed to enhance mental strength, stability, and vigor.

▼ Tourmaline

Chemistry	Crystal System	Hardness
SiO ₂ + B, Al	Hexagonal	7.0-7.5
Cleavage	Fracture	Specific Gravity
None	Variable	3.0-3.2

Tourmaline:

Tourmalines are abundant, complex boron and aluminum silicate minerals of variable composition.

Tourmaline comes in a wide range of colors, depending on its mineral composition. Black is the most common. Colors can vary from clear, to pink, rosy red, yellow, honey, green, blue, violet, brown and black. Some crystals are pink at one end and green at the other. Concentric color zoning often occurs as well. The colored varieties, when transparent and flawless, are cut as gems. In addition to its use as a gem, tourmaline is employed in pressure devices because of its piezoelectric properties.

Tourmaline forms slender, 3-, 6-, or 9-sided prismatic crystals (hexagonal system) in parallel or radiating groups, which causes it to develop an electrical charge when heated or deformed. Pieces cut perpendicular to the long axis can polarize light, and a pair of these plates form a very simple polarizing apparatus known as tourmaline tongs.

RICHWAY BIOMAT WITH AMETHYST PILLOW

QUANTUM ENERGY FABRIC INSIDE

This wonderful feeling is a dream come true!

BEST QUALITY AMETHYST (The Safest Energy Source)

Amethyst produces far infrared rays which are believed to help you feel rejuvenated.

THE FUNCTION OF LONG WAVE INFRARED RAYS: LONG WAVE INFRARED RAYS CHARACTERISTICS:

1) RADIATION

Radiation is one of the general characteristics of light, and this means that light reaches an object without using the air. For example, the sun's light reaches the earth through the vacuum of space by radiation.

2) DEEP IMPACT POWER

Another characteristic is the deep impacting power. Different from ordinary light beams and short wave infrared rays, long wave infrared rays can penetrate deeply. Because of this, they can warm your body from the inside out and stimulate our system.

ANTIBACTERIAL TEST RESULTS

- Test Method: KFIA-FI-1002
- Name of used bacteria: Staphylococcus aureus ATCC 6538
- Reduction Rate Of Bacteria (%): 99.9%

Staphylococcus aureus
